---

## Professional Summary

I'm a Computer Science student passionate about building scalable and practical software solutions. I enjoy turning ideas into working products — from web applications to cloud-powered services. Experienced in full-stack development through projects and internships, with hands-on work in ReactJS, Django, and AWS. Eager to contribute, learn, and grow in a collaborative engineering environment.

---

## Education

- **B.Tech – Computer Science Engineering**, NBKR Institute of Science & Technology – CGPA: 8.62
  - **Intermediate – MPC**, Sri Vema Junior College – 92.5%
  - **SSC**, Srichaitanya Techno School – 10 GPA
- 

## Experience

### Intern → Intern Lead

*CompSci Technology Solutions | Jan 2024 – Jul 2024*

- Promoted to Intern Lead for demonstrating technical expertise and leadership.
  - Led small development sprints and mentored new interns, improving project delivery times.
  - Developed and enhanced internal tools, owning full ReactJS frontend development for Invoice Generation and Certificate Generation.
  - Collaborated with Django, Flask, and database teams for API and microservice integrations.
  - Contributed to PyQt modules during selected sprint tasks.
- 

## Technical Skills

- **Frontend:** ReactJS, HTML5, CSS3
- **Backend:** Django, Flask (basics), REST APIs
- **Database:** SQLite3, DynamoDB, MySQL
- **Cloud:** AWS (Lambda, API Gateway, DynamoDB – academic/project use)
- **AI & Machine Learning:** Python, NumPy, Pandas, Scikit-learn, and TensorFlow
- **Tools & Others:** Git, GitHub, Linux, Data Science (NumPy, Pandas, Matplotlib)

## Projects

### Crinzing – AWS-Based Roast Feed App

*ReactJS • AWS Lambda • DynamoDB • Cognito*

A mobile-first app featuring roast-style message feeds with real-time likes and comments. Implements AWS Cognito for authentication, serverless backend via Lambda + API Gateway, and offline-first sync for seamless user experience.

### Invoice Generation System

*ReactJS • Flask*

Developed the full ReactJS frontend with smooth API integration and dynamic components. Supported Flask backend for generating and printing invoices in both A4 and thermal formats without extra setup.

### Certificate Generation Portal

*ReactJS • Django*

Built the complete ReactJS frontend with responsive UI, form validation, and workflow logic. Collaborated with Django backend and PyQt modules for integration and sprint feature delivery.

### PULSEVO – Team Productivity Dashboard

*ReactJS • Flask • SQLite3 • Recharts*

A real-time dashboard tracking team performance and task analytics with time-based filters, charts, auto-refresh with Advanced search, pagination, and performance metrics

**Outcome:** Ranked **1st Place** at *Hackathon Nellore 2025* for innovation and technical execution.

---

## Certifications

- **AWS Cloud Practitioner Essentials** – AWS Skill Builder (2024)
  - **Amazon Braket – Quantum Computing Foundations** (2024)
  - **NPTEL – Ethical Hacking** (2023)
  - **TCS CodeVita Season 12 – National Rank 704** (2024)
- 

## Achievements

- Promoted to Intern Lead at CompSci Technology Solutions.
- Secured National Rank 704 in TCS CodeVita.
- TerraLogic 2025 Hackathon Winning Team.
